Experience

Software Consultant
Invent Labs — Lubbock, Texas
July 2026 – Present

- Advises several software companies on technical and commercial growth strategy, spanning platform architecture decisions and go-to-market positioning.
- Collaborates with established engineering teams to help them adopt new industry trends such as AI native development.
- Scopes and negotiates client engagements end to end, from initial discovery through signed statement of work.
- Identifies client pain points during discovery conversations and translates them into prioritized technical solutions.

Head of Engineering
Palpabl — Lubbock, Texas
September 2025 – July 2026

- Owned the full product lifecycle of a cloud-native, multi-tenant SaaS platform, from concept origination through production-ready MVP delivery and go-to-market positioning.
- Drove the self-service commercialization strategy, including subscription infrastructure, storefront, and automated customer onboarding.
- Directed a team of 5 engineers and delivered the platform to go-live readiness within six months of active development.
- Worked with marketing and product teams to get company alignment and cross-cut non technical stakeholder requirements into positive technical outcomes.
- Prospected and qualified Palpabl's first paying customer and lead them through the onboarding process establishing critical go to market patterns for follow on sales associates.

Software Engineer
Mandry Technology — Lubbock, Texas
July 2024 – October 2025

- Authored the go-to-market brief establishing a $2–5 billion total addressable market and the platform's initial pricing model, presented for executive review, later approved.
- Secured three design-partner commitments by qualifying prospective accounts and leading solution discussions.
- Delivered a full-stack SaaS alpha in eleven months, building the application, cloud infrastructure, and automated release pipeline.

Network Engineer
Mandry Technology — Lubbock, Texas
August 2022 – July 2024

- Supported small-business, government, and healthcare clients in HIPAA- and SOC 2-regulated environments, serving as direct technical contact during deployments.
- Coordinated scheduled project deployments alongside reactive incident response across multiple concurrent client sites.

Education

B.S., Mechanical Engineering
Texas Tech — Lubbock, Texas
Expected May 2028
