

We are seeking a Business Development Intern with a passion to scale and deploy climate tech to join our team.

About Us:

2311 Climate Solutions is a climate tech startup that helps industries reduce their climate and environmental footprint. Our customizable reactive crystallization and separation technology platform effectively transforms CO₂ and industrial residues into valuable resources that generate revenue, while building a more sustainable and circular future. We are launching pilot projects with large industrial partners, and we are seeking passionate individuals who would like to work at an innovative, fast-paced company. We are a team of world-leading experts that have developed advanced partnerships with academia, industry, and climate tech stakeholders. Come join our team to close the carbon and materials loops, together.

Job Summary:

We are seeking a Business Development Intern with a passion to scale and deploy climate tech to join our team. You will play a critical role in establishing the growth and commercialization strategy. Your work will contribute to our mission of developing economical and scalable carbon management and resource recovery solutions.

Essential Job Functions:

- Conduct market research and analyses to identify industry trends, potential customers, partners, and verticals for our solutions.
- Prepare market intelligence reports and presentations to drive commercialization strategy.
- Support the development of collateral and presentations tailored to prospective clients and partners.
- Assist with pipeline management, including lead qualification and preparing for outreach engagements.
- Maintain and organize databases related to projects, market research, and industry trends
- Engage industry partners during pilot demonstrations, identify their pain points and discuss solutions.
- Collaborate with cross-functional teams to analyze potential strategic growth initiatives

Education and Experience Required:

- Bachelor's degree (or pursuing) in Business, Marketing, Finance, Economics, Communications, or a related field.
- 1+ years of experience in strategy, business development, partnerships, product, private equity, venture, or similar cross-functional roles

Additional Skills and Abilities:

- Must have excellent written and verbal communication skills.
- Must be able to demonstrate strong organizational skills, ability to multitask, and meticulous attention to detail.
- Must be willing to learn new skills and become familiar with business drivers in new industry sectors.
- Must be proficient with Microsoft Office software to complete analyses and present insights.
- Must be able to work as part of a team and to deliver results in a timely manner.
- Must be able to work independently and effectively collaborate with team members, resolve conflicts, and maintain morale.
- Must be able to work in a fast-paced, start-up environment, showing flexibility and pragmatism.
- Must be able to demonstrate high ethical standards and personal integrity.

Application Process:

1. Prepare your resume and cover letter.
2. In your cover letter, explain (1) why you want this internship, (2) why you would be a good fit for the **2311 Climate Solutions**, and (3) how this internship aligns with your career goals
3. Submit your application materials to Canvas.
